SUBJECT: BLUE LANTERN LEVEL 3: PRE-LICENSE END-USE CHECK
ON APPLICATION 05120964

REF: 2006 BLUE LANTERN GUIDEBOOK

1. This is an Action Request. See paragraphs 2-4.

2. The Department's Office of Defense Trade Controls Compliance (PM/DTCC) requests post's assistance in conducting a pre-license check on application 050120964 for the export of radiation hardened power converters and associated technical data to India. Post is requested to complete this Blue Lantern check within 30 days. Lack of response to a Blue Lantern check will affect pending and future licenses involving parties to this license.

3. Reason for request: Lack of documentation from foreign end-user Research Centre Inmarat and unfamiliar foreign consignee JD Technologies. JD Technologies has not appeared on any previous license applications, nor have the bona fides of the company been verified by a Blue Lantern check.

4. ACTION: Department requests that Embassy make appropriate inquiries to verify the bona fides of foreign consignee JD Technologies, and to confirm the legitimacy of this proposed transaction. PM/DTCC also requests that post conducts a site visit to the company in order to provide Department with an assessment of its business operations and on-site security. Finally, post is asked to assess whether the company appears to be a reliable recipient of USML items. If a site visit is not possible, please inform the PM/DTCC officer.

The following questions are provided as suggested guidance:

--Does the company have supporting documentation for this proposed transaction?

--What role will JD Technologies and Intraco Technology Pte Ltd play in the proposed transaction? Will JD Technologies and Intraco Technology be handling or storing the items listed on the application? If so, do they have secure facilities and proper accounting and security procedures for handling these sensitive USML items?

--What is the exact end-use for this USML item? Will JD Technologies retain positive control over the radiation hardened power converters and associated technical data at all times?

--When was the company established and who are its principals?

--What is the nature of its business -- what type of items does it handle, does it serve as a broker?

--What type of organizations are among its typical customers

and where are the customers located?

--Does the company understand the restrictions on United States Munitions List (USML) items, especially the prohibition against unauthorized re-transfers and re-exports?

END ACTION
